

## Conversion Area Requirements

**\$25 for every 100 sq.ft. converted from turf area to WaterWise landscape (minimum 500 sq.ft.) – maximum rebate check \$1,250**

- ≈ 75% of target area must be healthy turf prior to conversion.
- ≈ Must cap-off automatic sprinkler systems or change to drip or low-use in the converted area
- ≈ Must install native or adapted plants listed in the Plant Guide at [www.growgreen.org](http://www.growgreen.org) (Substitutions require approval)
- ≈ Conversion area must be comprised of 50% or more plant cover (at plant maturity)
- ≈ No more than 5% annuals
- ≈ Plant beds in areas outside of the drip lines of trees must add 1" compost to a minimum of 6" tilled soil.
- ≈ Top dress plant beds and mulch hardscape areas with a maximum of 2-3" hardwood mulch
- ≈ Must use weed barrier under gravel and mulch hardscape
- ≈ No water features are allowed in converted area
- ≈ No gravel in right-of-way less than 1" in diameter
- ≈ Cannot replace turf grass with another type of turf grass

# WaterWise Landscape Rebate Program

## Residential Program Guidelines

### Program Information

Austin Water is accepting applications to participate in the WaterWise Landscape Program. WaterWise Landscape refers to landscaping and gardening in ways that reduce or eliminate the need for supplemental water from irrigation. Major water savings can be made by converting your healthy turf grass to native plant beds and permeable hardscape.

### Program Details

- ≈ Applications will be accepted twice per year, December 1 – March 31 for spring installations and June 1 – September 30 for fall installations.
- ≈ You may enter the program more than one time if you have another eligible area of turf that can be converted to a WaterWise landscape. One application per period.

### Eligibility

- ≈ Program eligibility will be based upon completion of the application, quality of the turf grass being replaced, and size of the converted area
- ≈ This program is only available to Austin Water customers or a customer of a [qualifying water provider](#).

### Conversion Area Requirements Program Procedures

1. Fill out the application.
2. Applications must be signed and submitted by the property owner/account holder. An account holder which does not own the property will not be allowed to participate without the property owner's permission.
3. Along with the application, a site plan, planting plan, and pre-installation photos must be attached.
4. The site plan and planting plan does not need to be drawn to scale but must show property lines, the house, and include accurate square footage. (Turf area measurement guide attached).
5. Mail application and support information to:  

**Austin Water Conservation**  
**P.O. Box 1088**  
**Austin, TX 78767**  
**Or fax to: (512) 974-3504**  
**Or email to: [AWUlandscapeconversion@austintexas.gov](mailto:AWUlandscapeconversion@austintexas.gov)**
6. Austin Water staff will review the application, contact the applicant if a pre-inspection is needed, and provide a written response to the applicant.
7. All conversions must be approved prior to beginning work. Plant material must be installed between March 15 and May 15 (for spring incentive) and between September 15 and November 15 (for fall incentive).
8. Following installation, the applicant must notify Austin Water of completion by submitting final photographs along with applicable receipts and/or invoices for processing.
9. Austin Water staff will review the final materials (schedule a post-inspection if needed) and issue an incentive check within 4-6 weeks of program completion.

# How to Measure Turf Areas

## What You'll Need

- *Tape measure or wheel*
- *Plain or graph paper*

## Directions

1. Sketch the shape of the area of lawn that you want to replace.
2. Most landscapes are not perfectly shaped. If yours is irregular, break the landscape into separate squares, rectangles, circles and triangles, as shown at right. Measure the square footage of each shape, and add the area measurements together.

## Rectangle or square

**Area = Length x Width**  
*in feet*

## Triangle

**Area = Base x Height x 0.5**  
*in feet*

## Circle

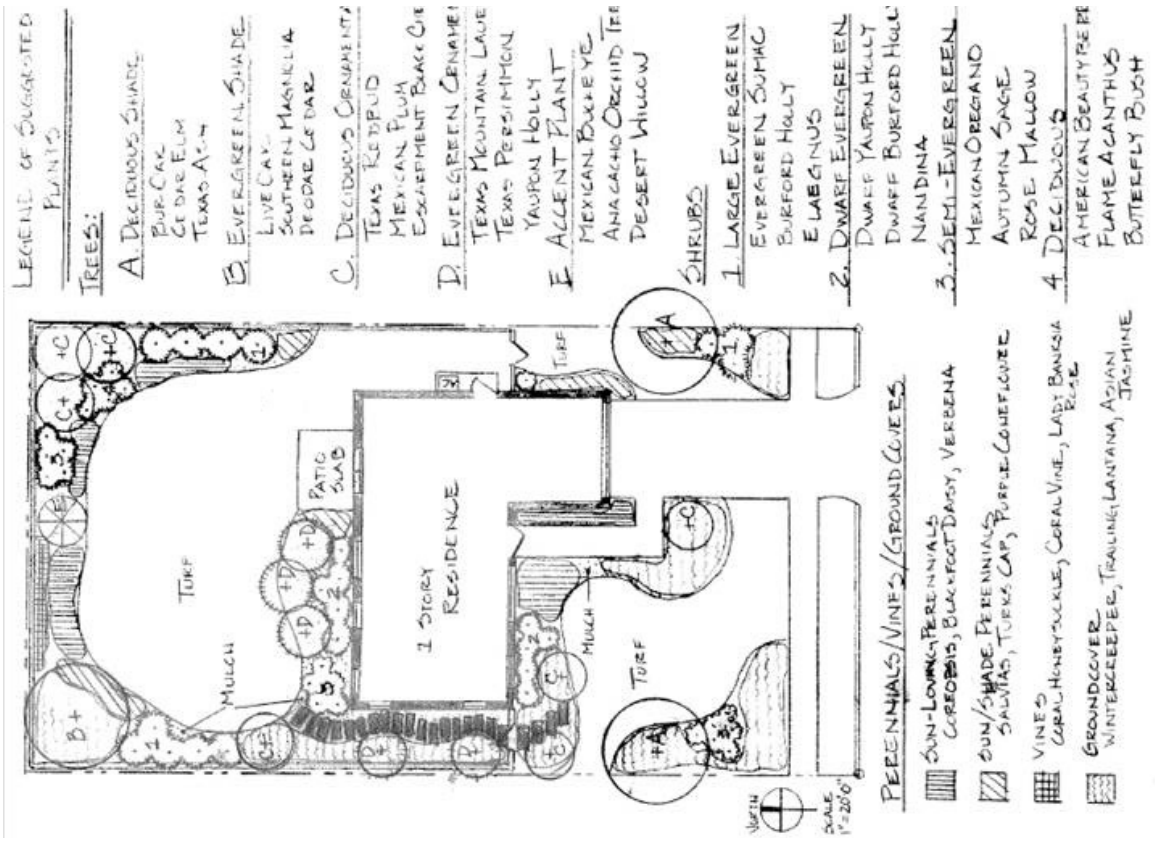

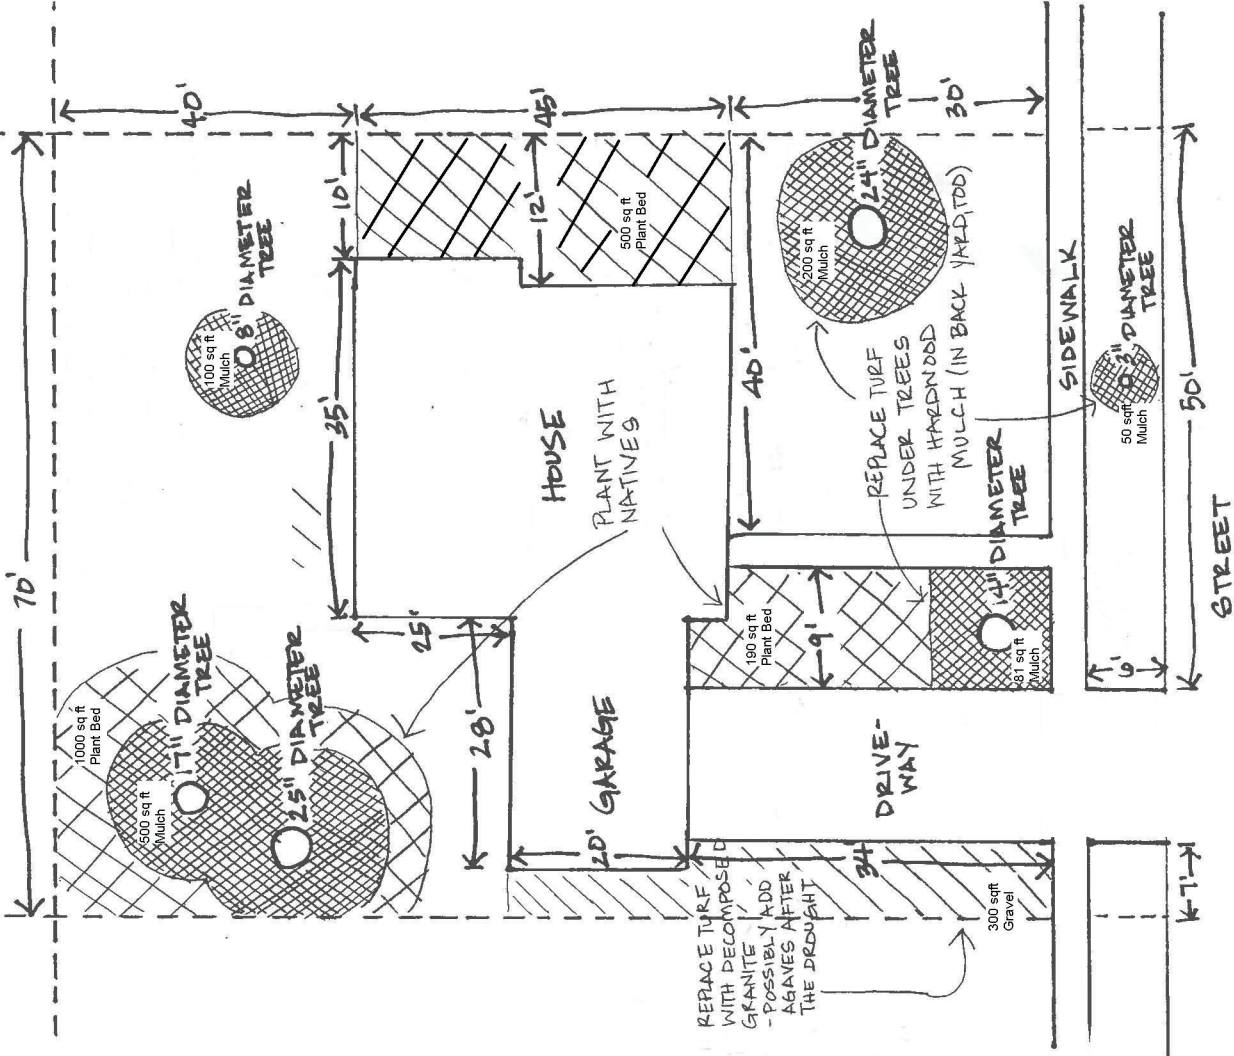

**Radius = Diameter x 0.5**  
**Area = 3.14 x Radius x Radius**  
*in feet*
